County Ranking by Average Annual Employment	*204*

INTRODUCTION

The primary purpose of this publication is to provide annual data on covered employment, total and taxable wages, premiums due, and average premium rates. Primary users include public and private researchers, governments, educational institutions, and labor organizations.

The publication contains county summaries of employment and wages by industry for firms covered by unemployment insurance during 1983. Included also is a summary for the state as a whole. The statistics were compiled from quarterly contribution and wage reports submitted to the Tennessee Department of Employment Security by employers subject to the Tennessee Employment Security Law.

State and local government and other nonprofit employers are allowed the option of reimbursing 100 percent of benefits paid to their former employees, or that of being experience rated and assigned a premium rate from one of the premium tables. The published totals include both premium-paying and reimbursing employers.

In cases where listing a firm under its specific industry would divulge confidential information concerning that firm, it is listed under the "All Others" category for that major industry group. If the firms allocated to "All Others" could still be detected, the data are listed under "All Other" manufacturing or nonmanufacturing at the very end of the county listing. This editing was necessary in order to comply with federal and state regulations regarding disclosure of individual firm data.

Shown in the first three columns of the tables are the number of reporting units (number of covered employers), the annual average employment, and the total wages paid in each industry during the calendar year. The total wage figure was divided by the annual average employment to obtain the annual average wage which, in turn, was divided by 52 to get the average weekly wage. The final three columns consist of taxable wages, total premiums due, and the average premium rate (total premiums due expressed as a percentage of taxable wages.)

The 1983 information may not compare with previous years because of a more detailed breakdown of the industry groups. Some information previously allocated to the "All Others" group at the end of each county is now included in the respective major industry group.

State totals for all industries are contained in the first table, "Statewide," followed by county breakdowns. The "Statewide County" table, following the individual county tables, is composed of data from firms having no established place of business in Tennessee, or having establishments in more than one county. Some multiestablishment firms file a combined report. The data for these establishments will not be included with the statistics for the particular counties in which they are located unless separate county reports are received. These employers will be found in the "Statewide County" table or in the county of the largest employment. When comparing county data from previous years, please keep in mind that additional county breakouts of multiemployers are added each year.

NOTE: Material in this publication is in the public domain and may be reproduced without permission of state government. Please credit the Tennessee Department of Employment Security, Research and Statistics Division, and cite the name of this publication.
